A Session Lecture opportunity at ISF-1

Dear Professor Li

The 1st International Solar Fuels Conference (ISF-1) will take place in Uppsala, Sweden from April 26 - May 1, 2015. As a response to our earlier discussions we are happy to provide you with the opportunity to present a session lecture during this conference.

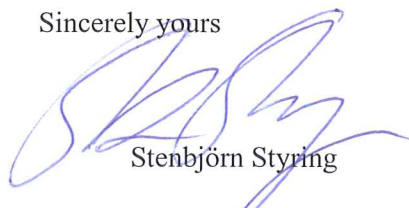

There is presently no broad, international conference series that covers the rapidly expanding solar fuels research. It is therefore our aim that this shall become the first in a new conference series that will rotate on a biannual basis between organizers around the world. The conference will bring together scientists working with both biological and chemical approaches to utilize solar energy for direct fuel production. Since our first announcements in the spring we have built the program and we are now filling the topical sessions.

In the topical sessions we have a few invited key note lecturers. The remaining part of the sessions is filled with talks selected from the registered abstracts (nearly 70 slots are available). The main part of these talks will be short and selected from the abstracts in February. However, we also have decided to make some slots available for a few selected colleagues if they register and provide an abstract. We are happy to offer you such a session lecture slot (20+5 min). Details about the Conference, the program and the registration is found at our updated homepage

We sincerely hope you are willing to use this opportunity and help us make the first conference in this new series a success.

Sincerely yours

Stenbjörn Styring

Peter Lindblad
